

# ALPACAS FROM EIGHTH AND MUD

TENCEL™ also known by its generic name Lyocell is considered to be a low environmental impact version of rayon/modal a cellulose-based synthetic fibre.

- ✓ **Wear & Tear:**
  - Durable and long lasting.
- ✓ **Biodegradability:**
  - Is biogradable so long as it isn't blended with petroleum based synthetic fibres.
- ✓ **Ability to build dye:**
  - Very easily dyed maintains colour well.
- ✓ **Temperature Control/Insulation:**
  - Extremely good and keeping in heat. Adaptive to tundra climates.
- ✓ **Softness:**
  - Lycoell as a silk like texture making it a good substitute for silk dress shirts and formal clothing.
- ✓ **Renewability:**
  - Collected from primary eucalyptus and the solvent used is 99% recycled making it a sustainable option
- ✓ **Bacterial Resistance:**
  - As this fibre has the ability to wick away moisture results in reduced bacterial growth.
